

IN THE CLAIMS

Claims 1-12 (cancelled).

13. (New) A method for adjusting climate control in a vehicle, comprising:
obtaining temporal data including at least current time information;
searching a database for a temperature range based at least on the temporal data;
and
adjusting the climate control to maintain a temperature in the vehicle within the temperature range.

14. (New) The method of claim 13 wherein the temporal data also includes current date information.

15. (New) The method of claim 13 further comprising obtaining location information concerning a current location of the vehicle, wherein the database is searched based also on the location information.

16. (New) The method of claim 15 wherein a geographic region is defined based on the location information.

17. (New) The method of claim 15 wherein the location information includes global positioning system (GPS) information.

18. (New) A system for adjusting climate control in a vehicle, comprising:
an interface for obtaining temporal data including at least current time information;
a processor for searching a database for a temperature range based at least on the

temporal data; and

a controller for adjusting the climate control to maintain a temperature in the vehicle within the temperature range.

19. (New) The system of claim 18 wherein the temporal data also includes current date information.

20. (New) The system of claim 18 further comprising a device for obtaining location information concerning a current location of the vehicle, wherein the database is searched based also on the location information.

21. (New) The system of claim 20 wherein a geographic region is defined based on the location information.

22. (New) The system of claim 20 wherein the location information includes GPS information.
